

100% Granular Diatomite Absorbent

FLOOR-DRY™

Absorb More With Less

Automotive

FLOOR-DRY™ brand diatomaceous earth (DE) absorbent is highly purified and calcined (kiln-fired) for superior absorbent qualities. The unique structure of the diatomite provides FLOOR-DRY brand DE greater pore space. Because of this, pound for pound it absorbs more liquid than any other mineral on the market today. In fact, FLOOR-DRY absorbs twice as much liquid as calcined clay. FLOOR-DRY cleans up spills with no slippery residue or film, making the clean-up area safer, and because you use less, there is less disposal of used material.
